

FAYIMA RAHUMAN

AI-ASSISTED FULL STACK DEVELOPER | MACHINE LEARNING & SOFTWARE BUILDER

📍 Entebbe, Uganda

✉ Email: fayimarahuman2002@gmail.com

☎ Phone: 0777150997/0742221194

🌐 LinkedIn: <https://www.linkedin.com/feed/>

📁 GitHub: <https://github.com/>

PROFESSIONAL SUMMARY

Passionate AI-assisted Full Stack Developer focused on designing and building intelligent software solutions that solve real-world problems.

Experienced in full-stack application development using Python, JavaScript, React.js, Flask, REST APIs, PostgreSQL, MySQL, and machine learning technologies. Skilled in transforming ideas into functional products through rapid prototyping, problem-solving, and continuous learning.

Developed an AI-powered Dental Clinic Management and No-Show Prediction System that combines machine learning, analytics dashboards, database management, and automation to support healthcare decision-making.

Actively uses artificial intelligence tools as development partners to accelerate coding, debugging, research, learning, and product development. Passionate about using AI and emerging technologies to build impactful solutions for Africa.

TECHNICAL SKILLS

Programming Languages

- Python
- JavaScript
- HTML5
- CSS3
- SQL

Frontend Development

- React.js
- JavaScript ES6+
- Responsive Web Development
- Bootstrap
- UI/UX Design Principles
- Figma
- Canva

Backend Development

- Flask
- Flask RESTful APIs
- REST API Development
- Backend Integration
- Application Logic Design

Databases

- PostgreSQL
- MySQL
- Database Design
- SQL Queries
- Data Management

Machine Learning & Data Science

- Scikit-learn
- Pandas
- Data Cleaning and Processing
- Feature Engineering
- Predictive Modeling
- Random Forest Classification
- Data Visualization

ARTIFICIAL INTELLIGENCE & AI-ASSISTED DEVELOPMENT

Hands-on experience using AI tools to improve software development workflows, research solutions, accelerate learning, and build applications.

AI Tools Used

- ChatGPT
- Claude AI
- Google Gemini
- DeepSeek
- Grok AI
- Blackbox AI
- GitHub Copilot
- Cursor AI
- Replit AI
- Perplexity AI
- Antigravity AI
- AI Chatbot platforms and conversational AI tools

AI Applications

- AI-assisted software development
- Code generation and improvement

- Debugging and troubleshooting
- Technical research
- Prompt engineering
- Rapid prototyping
- Exploring AI-powered applications
- Improving developer productivity

PROJECT EXPERIENCE

AI-Powered Dental Clinic Management & No-Show Prediction System

Final Year Project

GitHub:

<https://github.com/fayimarahuman/shallom-dental-clinic>

Demo:

<https://shallom-dental-clinic-yoj8kzapfk4c5vsurtnq5z.streamlit.app/>

Credentials to use [username: admin, password: admin12345]

Developed an intelligent healthcare management system that uses machine learning and analytics to improve dental clinic operations.

Key Contributions:

- Designed and developed a complete clinic management application.
- Built a machine learning model to predict patient appointment no-shows.
- Applied data preprocessing, feature engineering, and predictive modelling techniques.
- Developed interactive dashboards for analysing appointments, patients, payments, and clinic performance.
- Designed database structures for patients, appointments, payments, and inventory management.
- Integrated predictive analytics into a practical healthcare workflow.
- Managed the complete development process from requirements gathering to deployment.

Technologies:

Python, Scikit-learn, Pandas, Streamlit, PostgreSQL, Machine Learning, Data Visualization

Note:

The system is an internal clinic dashboard. Demo access is provided through a controlled demonstration account or video walkthrough to protect confidential information.

Caroline Ways Ltd Product Display Website

GitHub:

<https://github.com/fayimarahuman/Recess-website-projects>

Live Website:

<https://www.carolineways.com/>

Developed a full-stack product display website for a lighting accessories business.

Key Contributions:

- Built a responsive frontend using React.js.
- Developed backend services using Flask.
- Created communication between frontend and backend using REST APIs.
- Integrated database functionality.
- Designed a user-friendly interface for displaying business products.
- Delivered a complete digital solution based on client requirements.

Technologies:

React.js, JavaScript, Flask, REST APIs, MySQL/PostgreSQL, HTML5, CSS3, Bootstrap

AI-ASSISTED SOFTWARE DEVELOPMENT EXPERIENCE

- Use AI tools as development assistants throughout the software development lifecycle.
- Apply AI to understand new technologies, debug errors, generate ideas, and improve implementation approaches.
- Use AI-assisted workflows to accelerate development while maintaining understanding of the underlying code.
- Experiment with emerging AI technologies to build prototypes and improve productivity.

EDUCATION

Diploma in Computer Science and Technology

Women's Institute of Technology and Innovation (WITI)

Final Year Student

Relevant Coursework:

- Web and App Development
- Database Management Systems
- Python Programming
- Data Structures and Data Science
- Computer Hardware
- Research Methods
- Entrepreneurship and System Analysis and design

PROFESSIONAL EXPERIENCE

Cashier

8 Months Experience

Responsibilities:

- Managed customer transactions accurately.
- Maintained financial records and daily reports.
- Developed communication, problem-solving, and customer service skills.
- Worked efficiently in a fast-paced environment.

DEVELOPMENT TOOLS

- Git
- GitHub
- Visual Studio Code
- Postman
- npm
- Streamlit
- Figma
- Canva

PERSONAL STRENGTHS

- Fast learner with strong self-directed learning ability.
- Passionate about artificial intelligence and emerging technologies.
- Enjoy building products from ideas to working solutions.
- Comfortable adapting to new tools and technologies.
- Strong problem-solving and analytical skills.
- Interested in creating technology solutions that positively impact Africa.
